---

### PROJECT:

Jarvis A.I:

This software aims to develop a personal assistant for Windows-based systems. The primary purpose of the software is to perform user tasks based on specific commands provided either through speech or text. It will simplify many user activities, allowing complete tasks to be executed with a single command. The assistant draws inspiration from virtual assistants like Cortana for Windows and Siri for iOS. Users can interact with the assistant through either voice commands or keyboard input.
